

Monthly notices of the Royal Astronomical Society Volume . 54

Filesize: 7.6 MB

Reviews

Basically no phrases to describe. I was able to comprehend everything out of this published ebook. You can expect to like the way the author compose this ebook.
(Mrs. Novella Will)

MONTHLY NOTICES OF THE ROYAL ASTRONOMICAL SOCIETY VOLUME . 54

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 216 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . other radius OB of the same length as OA will be divided uniformly into a smaller number of parts. For Fig. 6. convenience new perpendiculars may be drawn at any other radius 00, OD, and c. Let us call a circular sector so divided a reducing scale. Thus if FGH (tig. 6) be again our T square, and a reducing scale OAE be pivoted at O on the edge FK, then the maximum ordinate OB can be divided into any arbitrary number of parts p by rotating the reducing scale. Let us now cut out of card a single tine curve VAR, which may be slid beneath the arm FK of the T square, the edge WX of the card bearing against the T of the square. Then the ordinate OP will be $p \sin (P a)$, as before, if the index be adjusted so that $(P a)$, and not a simply, be read off on tho sliding scale. 12. So long, however, as we use a slide for setting in R. A. we get the sine curve entering into the machine. If the R. A. is to be set off on a uniform scale--which is practically a necessity if we are to form the sum $(P4)$ mechanically--we are limited to two methods--those of translation and of rotation. It is curious that I should have dwelt so long upon the slide for R. A. , for the graduated circle is obviously more appropriate. But one...
