THE CHIMPANZEES OF THE BUDONGO FOREST: ECOLOGY, BEHAVIOUR, AND CONSERVATION

DOWNLOAD

Oxford University Press, London, 2005. Hardcover. Book Condition: New. First Edition. An invaluable addition to the description of chimpanzee behavioural diversity, and a classic demonstration of how to combine research and conservation. Even more, it is an elegant introduction to the natural history of a species that still offers important biological puzzles. Primatologists are lucky to have the dedication, persistence, and sheer determined-ness of a small band of field researchers who have personally held together such long-term studies. Vernon Reynolds, the author of this synthetic new book is one such scientist. For anyone working with chimpanzees or other primates, it is a valuable contribution. Only rarely these days do scientists have the time, energy or financial and logistical support to be able to pull together such a comprehensive work. P.C. Lee, University of Stirling, *Folia primatologica*. Bound in laminated pictorial boards. No Jacket, as Issued. Size: 8vo - over 7¾" - 9¾" tall.
